BLANK PRESCRIPTION

- what's that?

bring this prescription to us. A therapist examines you and discusses with you which treatment (which remedies) and what number of sessions make sense. If your complaints are not resolved afterwards, you can arrange further treatments with the therapist. This blank authorization is valid for a total of 16 weeks.

Small note: The treatment must begin within 28 days (or 14 days for urgent needs) after issuance.

This procedure has significant advantages for you:

- You no longer need to go to the doctor after a prescription expires to get another one. As mentioned, the blank prescription is valid for 16 weeks. **(= You save TIME)**
- You can discuss with your therapist at any time which treatment benefits you the most. Treatments can be easily changed and supplemented. You can end treatments when you feel better again. **(= Good for your optimal quick recovery)**
- And you pay less: we explain this with an example on the back. **(= You save MONEY)**

But not everything changes - some things remain the same:

- You will continue to receive the prescription from your doctor.
- You confirm each treatment as usual with your signature.
- Your co-payment obligation continues for your prescription, unless you are exempt from the prescription fee.

What do you have to co-pay?

As before, you pay 10% of the treatment costs yourself. For example, for physiotherapy (PT), this is 2.78 EUR. And you pay a flat fee of 10 EUR for a prescription.

Now for our small example: You need a total of 12 treatments (PT). The doctor could initially only prescribe 6. So you needed 2 prescriptions.

When do you pay?

After the physiotherapeutic diagnosis (PD) and the determination of treatments, you pay initially for 6 treatments + PD. Before the 7th treatment, you then pay for the next 6 treatments.
